EDUCATION

Rutgers University

B.S. in Computer Science and Data Science

- **GPA:** 3.6/4.0
- **Coursework:** Machine Learning, Data Structures and Algorithms, Object-Oriented Programming, Information Technology Fundamentals, Networking

SKILLS

- **Language:** Java, Python, Bash, HTML/CSS, SQL, Javascript
- **Frameworks & Libraries:** ReactJS, Node.js, TensorFlow, NumPy, Pandas, AI/ML tools
- **Platform & Tools:** Google Cloud Platform (GCP), Git/GitHub, APIs, Windows, Jupyter Notebook, CRM (GoHighLevel)
- **Data & Visualization:** Tableau, Power BI, Data Management, Statistics
- **Specializations:** Software Development, Data Engineering, AI/ML Tools, Data Modeling, Cross-Functional Collaboration, Cybersecurity

WORK EXPERIENCE

Johnson & Johnson

May 2024 - Aug 2024

Contracting Solution Intern

Raritan, NJ

- Streamlined SaaS migration testing through **Q-Test script analysis**, improving testing efficiency by **55%**.
- Achieved **98% accuracy** in the MedTech Traceability Matrix, strengthening **compliance**, documentation quality, and audit readiness.
- Reorganized documentation workflows, reducing retrieval time by **30%** and improving team efficiency and information accessibility.

Rees Scientific

Jul 2025 - Dec 2025

Data Engineer Intern

Trenton, NJ

- Optimized **SQL/Python data pipelines** for **500+ environmental sensors**, improving data accessibility, reliability, and monitoring capabilities.
- Collaborated on data modeling to maintain data integrity in calibration records, streamline validation, and support accurate system assessments.
- Developed and maintained **Tableau** and **Power BI dashboards** to track operational metrics and **system alerts**, enabling proactive monitoring and performance optimization.

TechThought.org

May 2025 - Jul 2025

AI Software and Systems Development

Hampton, NJ

- Developed an autonomous content pipeline using **Google and X.com APIs**, automating data aggregation and publishing workflows.
- Engineered the system to publish **4 daily tech articles**, creating a library of more than **400 posts** through automated workflows.
- Increased user engagement by **60%** across digital platforms through AI-curated content and analytical performance improvements.
- Designed a data integration module to parse and validate information from **50+ verified sources**, strengthening data quality and validation controls.
- Leveraged **Linux** and **Ubuntu** virtual machine environments to support software development, testing, and system configuration.

Photonic Electric LLC

Jan 2026 - Present

Operations Operator

Remote

- Utilize **CRM** and digital experience platforms, including **GoHighLevel**, to monitor customer trends, identify process bottlenecks, and improve adoption of digital tools.
- Contribute to continuous improvement initiatives by tracking sales team metrics, streamlining order processing, and resolving complex contract discrepancies.
- Develop customer-centric websites that accurately capture inbound property data and automate estimation reporting.
-

PROJECTS & RESEARCH

Solve for Tomorrow

Jan 2021 - May 2023

Samsung

Princeton, NJ

- Designed a sustainable soap product using bug oil, leading the team to win the contest and a \$200,000 prize.
- Built an **Arduino-powered automated system** for cultivating soldier flies, increasing production efficiency by **50%** through creative problem-solving and process automation.
- Presented innovative solutions to a panel of judges, showcasing expertise in automation and sustainability.

Maritime Risk Dashboard

Rutgers University

Rutgers University, NJ

- Built an interactive vessel-tracking dashboard using **risk-scoring models** and **anomaly heatmaps** to visualize maritime hazards and irregular ship movements.
- Applied risk-scoring models and anomaly heatmaps to analyze potential maritime hazards and irregular ship movements.
- Designed a data-driven interface that enables users to interpret complex vessel-tracking datasets through intuitive **visual analytics**.

LEADERSHIP EXPERIENCE

MCCC Muslim Student Association

Sep 2023 - May 2025

President

- Led the Muslim Student Association, coordinating weekly events and team operations to boost campus engagement.
- Oversaw strategic budgeting and cross-functional programming across cultural, educational, and service initiatives.
